

Bi-Dri Glyphosate Granules 700g/kg

Macpherson's Bi-Dri Glyphosate Herbicide is used in the effective control of annual and perennial weeds, unwanted trees and noxious woody weeds. The superior granular formulation is designed specifically so it can be used around water environments and on aquatic weeds. Bi-Dri is double the strength of comparative liquid glyphosate and is ideal for environmentally sensitive areas like dams, waterways, rivers, streams, drains, channels, forestry, pasture, commercial, industrial and public service areas.

Benefits Include:

- Environmental aquatic registration (frog friendly)
- Fully loaded, with the wetter & surfactant included in the granule
- Faster kill time and shorter rain fast period than comparative concentrate liquids
- OHS compliant – a 10kg carton is easier and safer to handle than a 20L drum of liquid concentrate (25kg)
- Environmentally friendly packaging, no plastic drum to dispose of
- Soluble granule that completely dissolves in water to make spray mix
- Compatible with a full range of herbicides (refer to direction of use)
- Registered to kill over 100 different types of noxious weeds
- Proudly Australian owned and manufactured.
- The active ingredient, glyphosate present as mono-ammonium salt is transferred through the weed faster than traditional liquid concentrate formulas. This means Bi-Dri offers a quicker kill and shorter rain fast period. Bi-Dri granules completely dissolve in water and are very convenient to mix and store with no plastic drums to dispose of. The cartons are easier to handle than heavy drums.

General Mixing Rate: 5 grams per 1 litre of water
Refer to directions of use for specific mixing rates

Recommended Use:

General purpose

Forestry

Pasture

Aquatic situations including dams, waterways, rivers, streams, drains & channels

Commercial & Industrial

Public service areas.

Pack Sizes:

750g carton - (10 x 75 gm satchels) - each 75gms makes approx. 15L of spray.
Convenient for knapsack sprayers).

5kg carton - (10 X 500gm satchels) - each 500gm pack makes approx. 100L of
spray, convenient for 100-500L quick sprays

10kg carton - (1 x 10kg pack) - 10kgs makes approx. 2000L of spray.

Manufacturer: Ronic International Pty Ltd.

APVMA Approval Number: 58946.

Proudly Australian Made
