

GLYPHOSATE HERBICIDE

Liquid Concentrate Non-Selective Herbicides

Glyphosate 360

Active Ingredient: Glyphosate 360g/L (present as the Isopropylamine salt)

Similar or Equivalent Products: Roundup Biactive Herbicide® Monsanto
Aquatic registration - Suitable for use around waterways, public areas, home gardens & aquatic areas.

Broad Spectrum - registered to control a range of annual, perennial and woody weeds

Non Residual - kills the weeds, but is non residual in the soil

Pack Sizes: 1L, 5L, 20L & 1000L

Glyphosate 450

Glyphosate 450 Herbicide is a concentrate weed killer that includes a:

- Non-residual knockdown control of emerged weeds
- Translocated throughout foliage and kills plant roots
- Effective against almost all weed species
- Rapidly breaks down to natural products in the environment Very low toxicity to humans and animals
- Compatible with certain residual herbicides for extended control of annual weeds.

Active Ingredient: 450g/L Glyphosate (present as the Isopropylamine salt)

Similar or Equivalent Products: Roundup® Monsanto, Glyphosate CT® Nufarm, Wipe Out 450® FarmOz

Pack Sizes: 20L & 1000L

Glyphosate 540

Glyphosate 540g/L Herbicide is a concentrate weedkiller that has a formula that makes it perfect for hard-to-kill weeds and problem trees.

Effective against a wide range of; annual weeds, perennial weeds, woody weeds and problem trees.

Glyphosate 540g/L Concentrate also contains sophisticated surfactants that make it work very efficiently - BUILT IN SURFACTANT FOR GREATER CONVENIENCE & NO NEED TO ADD A GENERAL PURPOSE WETTER.

Used according to instructions, this herbicide kills weeds right down to the roots without poisoning the soil.

Glyphosate 540g/L is taken up through the leaves and moves in the sap flow throughout the plant. It stops the production of proteins so that the plant starves. This process is found only in plants. Glyphosate 540g/L is not absorbed from the soil by plant roots, so applying it to the soil is wasteful. Glyphosate 540g/L has extremely low toxicity to humans, pets and wildlife. Its impact on the environment has been extensively tested.

Glyphosate 540g/L Herbicide is designed to offer faster, stronger and more convenient weed control in a one drum package. It delivers robust performance on tough weeds, is labelled compatible with more tank mix herbicides than any other knockdown herbicide, and provides a 1 hour time to sowing interval on seedling annual weeds. To be used as per the product label

Active Ingredient: 540g/L Glyphosate (present as the Potassium salt)

Similar or Equivalent Products: Roundup Powermax® Monsanto

Pack Sizes: 20L & 1000L
