

Hi-Light Blue Glyphosate 700 Granules

Hi-Light Blue Glyphosate 700 Granules are made from a superior granular formulation that includes blue marker dye and is used in the effective control of annual and perennial weeds, unwanted trees and noxious woody weeds. Designed specifically with a convenient marker dye for easy use it can also be used around water environments and on aquatic weeds, Hi-Light Blue is double the strength of comparative liquid glyphosate and is ideal for environmentally sensitive areas like dams, waterways, rivers, streams, drains, channels, forestry, pasture, commercial, industrial and public service areas.

Benefits Include:

- 'All in one' - blue marker dye and wetter included – just one mix and spray
- Ideal for woody weed eradication, avoiding overspray
- Easy identification where spray marking is required
- Environmental aquatic registration (frog friendly)
- Faster kill time and shorter rain fast period than comparative concentrate liquids
- OHS compliant – a 10kg carton is easier and safer to handle than a 20L drum of liquid concentrate (25kg)
- Environmentally friendly packaging, no plastic drum to dispose of
- Soluble granule that completely dissolves in water to make spray mix
- Compatible with a full range of herbicides (refer to direction of use)
- Registered to kill over 100 different types of noxious weeds
- Proudly Australian owned and manufactured.

The active ingredient, glyphosate present as mono-ammonium salt is transferred through the weed faster than traditional liquid concentrate formulas. This means Hi-Light Blue offers a quicker kill and shorter rain fast period. Hi-Light Blue granules completely dissolve in water and are very convenient to mix and store with no plastic drums to dispose of. The cartons are easier to handle than heavy drums.

Pack Sizes:

5kg carton - (10 X 500gm satchels). Each 500gm pack makes approx 100L of spray. 5kg Convenient for 100 - 500L quick sprays.

15kg carton - (1 x 15kg pack). Makes approx 3000L of spray

Recommended Use: general purpose, forestry, pasture, designated aquatic situations like dams, waterways, rivers, streams, drains, channels etc, local parks and lands, golf courses, landscape gardeners, revegetation, commercial, industrial and public service areas.
