

Metsulfuron-Methyl 600 WDG Herbicide

For the control of brush and broadleaf weeds in native pastures, rights of way, commercial and industrial areas and for the control of certain broadleaved weeds in winter cereal crops as per the directions for use table'

BRUSH CONTROL: Metsulfuron Methyl 600 controls more than 40 different species of brush, broadleaf and bulbous weeds. Mixed infestations of hard to control woody weeds, including Lantana, Gorse, Bracken, Tree-of-Heaven and Blackberry, are also easily controlled with one pass. Metsulfuron Methyl 600 also controls nuisance pasture weeds, including Doublegee, Erodium, Sorrel, Onion grass and Paterson's Curse, & many more. For a full table of weeds controlled, refer to directions of use.

BROAD ACRE: Metsulfuron Methyl 600 is a highly selective herbicide for the control of many broadleaf weeds in winter cereals. It can be applied any time from the three-leaf stage of the crop - when weeds are young and actively growing - to before booting. Metsulfuron Methyl 600 is compatible with a wide range of grass and broadleaf herbicides, making weed control even more cost-effective with one-pass application.

Active Ingredient: Metsulfuron Methyl 600g/kg

Similar or Equivalent Products: Ally® (Du Pont), Brush-off® (Du Pont), Brush-Killer® & Associate® (Nufarm)

Pack Sizes: 500gm

Mixing Rate: General mixing rate is 1 gram per 10 litres of water (refer to directions of use supplied with product prior to spraying).

Manufacturer: Agri West Pty Ltd.

APVMA Approval Number: 63545

Directions of use supplied with Product. MSDS sheet available upon request.
