

Spectrum[®] 200SC Insecticide & Termiticide

Spectrum[®] 200SC Insecticide & Termiticide is a systemic insecticide that targets sucking insects and is soft on non-target insects such as ladybirds, hoverflies, spiders and predatory mites. Spectrum[®] 200SC Insecticide is used in the control of aphids, mirids and brown flea beetle on cotton; green peach aphid, woolly aphid, grey cabbage aphid and turnip aphid on crops specified in the directions for use table; and for the control of some insect pests of ornamentals. Also for the use and management of subterranean termites.

Spectrum[®] 200 SC Insecticide & Termiticide is similar or equivalent to Confidor[®] 200SC Insecticide and Premise[®] 200SC Termiticide.

Controls aphids, azalea lace bugs, silverleaf whitefly, thrips, longtailed mealybug, hibiscus flower beetle, harlequin bug, bronze orange bug, Fullers rose weevil, psyllids & soft scale on ornamentals, roses and various fruit trees and vegetable. Systemic action – absorbed through the foliage and moves throughout the plant to control insect pests – Works from the inside out
