## Spray Marker Dye - Red

Spray Marker Dye has been specially formulated to assist in identifying sprayed areas and is suitable for use with both liquid and powder herbicide formulations. Spray Marker Dye is a premium product which will prevent over-spraying and minimise the wastage of costly chemicals. Colour fades in 3 – 5 days in sunlight.

**Active Ingredient:** 150g/L Rhodamine B

**Mixing Rate:**

5 - 10ml Per 10 litres of spray solution

50 - 100ml Per 100 litres of spray solution

Use higher rate if a more intense colour is required

20 - 30ml Per 10 litres of foam marker diluted mixture. Will convert white foam to pink for easier identification.

**Mixing:**

Premix Spray Marker Dye thoroughly with water before adding to herbicide. Add the premixed solution to the spray tank and agitate prior to adding any other product. Slowly add the herbicide while agitating the spray tank. Thoroughly clean out equipment after each use. Equipment that is not completely clean may cause discolouration of subsequent sprays.

**Pack Sizes:** 1L, 5L & 20

**Manufacturer:** Spalding Holdings Pty Ltd

**APVMA Number:** 62843

*Directions for use & MSDS is available upon request.*
